

Elite Wall Panels

About us...

Jain's[®]
PVC CEILING & WALL PANELS

Company Overview

Jain's is a premier and well-known manufacturer and importer of PVC profiles in India, since the year 2000.

The company's versatile product range comprises profiles for partition ceiling and wall panels.

These products are used as a substitute for wooden panels that helps in preserving our environment.

Quality is our most successful attribute and the key to our success, today and tomorrow. We ensure growth commitment by offering quality product and service that exceeds the customer's expectations at a profitable and reasonable cost.

We have a sound infrastructure. We source finest quality products for the benefits of our clients. Our spacious warehouse has the capacity to store large quantities of products. We possess a team of experts who are sourcing products of international standard to keep abreast with the market requirements.

PVC Ceiling & Fluted Panels

Jain's PVC's pre-finished Ceiling Panels have many advantages over a POP Ceilings and are much more cost effective when installed. Installation time is significantly reduced – A standard 10ft x 12ft ceiling can be installed with Jain's PVC Ceiling Panels within a matter of a few hours compared to 3 days with a POP Ceiling including the drying time and painting time. Along with time, it also saves you money since once installed, you need not paint it ever again.

PVC Wall Panels

Jain's PVC Wall Panels have the same advantages as the PVC Ceiling and is available in numerous designs and colours. Once installed, the wall panels would need no sanding, painting or grouting. The wall panels have male and female edges running along the length making it easy to interlock and install. The design of the panels makes it a continuous smooth surface when interlocked with the other panels thus giving a smooth, rich and flawless look. Similar to that of the Ceiling panels, the wall panels also have a wide range of designs to choose from.
