FLOORWORKS®

The Creative Floor Covering to Meet Today's Design Needs.

Description

FLOORWORKS® TILES are extremely high resistance vinyl floor coverings designed to reproduce the natural beauty of real marble, granite, slate, and wood. It is manufactured to combine industrial-grade wear performance, care-free maintenance and a surprisingly low installation cost which makes it affordable for many construction projects.

FLOORWORKS® TILES are engineered for high profile public areas such as reception and entrance space, all types of shops, banks, supermarkets, restaurants, food areas, boutiques, hair salons and customer service areas. They are equally suitable for residential floors of domestic homes.

The elegance and Beauty of FLOORWORKS® TILES are unsurpassed. All tiles are asbestos free, produced from recycled materials, and are environmentally safe and friendly. The random nature of wood and other natural materials from which our designs are taken, means that variation in color and shade is normal and enhances the natural look of our products.

Construction

FLOORWORKS® TILES uses a high-tech 100% PVC patterned photographic print film layer encapsulated between a heavy duty clear PVC wear layer and vinyl backing.

Installation

Sub-floor must be clean, dry, smooth, and level. It needs to be free from dust, grease, oil and other impurities. Material should be placed at room temperature 24 hours prior to installation.

Maintenance

All quality floorcoverings require routine attention to help keep their beauty and attractiveness. FLOORWORKS® TILES offers great wear resistance with easy maintenance. Our material is permanently anti-static to greases, oil and dilute acids. Our embossed clear wear layer is formulated to protect the designs, disguise scuffs and scratches and provide long life with minimum maintenance.

Specifications

Wear Layer : 0.1-0.5 mm
Overall Thickness : 1.5-5.0 mm

Now with UV protection

Certificate : TW98/12524

Certificate : TW09/00305
